Delivery has failed to these recipients or groups:
[illegible]@[illegible].com (postmaster@[illegible].com) [illegible]
The email address you entered couldn't be found. Please check the recipient's email address and resend or create a connection from your email system.
Contact the recipient by some other means (by phone, for example) and ask them to tell their email admin that it appears that their email system is relaying connections from your email server. Give them the error details shown below. It's likely that the recipient's email admin is the only one who can fix this problem.
Diagnostic information for administrators:
No connection could be made because the target computer actively refused it. This usually results from trying to connect to a service that is inactive on the remote host. that is, one with no server application running. For more information and tips to fix this issue see this article: https://go.microsoft.com/fwlink/?LinkId=389782
